With regard to Levy (US 6,734,147), newly cited, although Levy makes reference to grafts of biodegradable polymers with acrylamide, Levy does not teach or suggest grafts of biodegradable polymers with (meth-)acrylamide derivatives which are thermally reversible. Furthermore, even with respect to grafts of biodegradable polymers with acrylamide taught by Levy, there is no explicit suggestion or teaching that they are thermally reversible nor could an argument be made that Levy's materials are inherently thermally reversible given that no process for production or other details of the structure of Levy's materials are present such as would be needed in order that it could be said that Levy's materials reasonably appeared to be inherently thermally reversible.

The terminal disclaimer filed on 7-9-04 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of usp 6,296,831 has been reviewed and is accepted. The terminal disclaimer has been recorded.
